

## Yard Waste Removal Restrictions and Disclosure Form

### Directions for Use

- € Fill your bag with yard waste, soils and clays, sand and concrete only. Concrete must not contain steel or rebar reinforcement. Other materials will not be accepted. For assistance or any questions, please contact StonePlace at 519-624-7500.
- € Take care of your bag; although it is strong, sharp objects should not go in the bottom of the bag.
- € Position the bag in its final pickup location and use it like a dump bin. Any attempt to move it once filled can result in damage to the bag or personal injury. The bag will be collected by a truck with a rear mounted forklift which requires minimum 10 ft of clearance, both widthwise and heightwise. Your signature below accepts the risk and responsibility for the forklift to enter your property for the purpose of collection the yard waste removal bag.
- € Fill the bag to a maximum of 1 ton (2000 lbs). As a guide, that would be approx. 2/3 full of heavy soil.
- € We reserve the right to refuse collection if the bag is positioned beyond the access of our forklift, if our operator cannot gain access to the bag in a safe manner, if the bag is overloaded, torn or contains anything other than yard waste. If collection is refused for any of these reasons, you may not be entitled to a refund.
- € Any bags found to contain unapproved materials upon inspection at our collection depot will result in additional disposal charges.

### Declaration of Non Hazardous Goods

I declare my bag meets the requirements for collection and does not contain hazardous waste material.

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Signature: \_\_\_\_\_

Complete the above declaration and place inside bag pouch.
